ASTER—LITTLE GIANTS "Wilt Resistant"

Here is a distinctive new type of early Aster. Plants grow 12 inches tall and form a perfect mound of flowers. Its blooms are of the feathery Crego type, 4-5 inches in size, and a plant will have 40-50 flowers showing at the same time. Habit of growth is somewhat similar to a miniature Christmas tree, as the branches spread laterally out from a strong center trunk. Each branch carries from 3-5 flowers. Well suited for bedding purposes, or for borders in front of the taller and later flowering sorts. Extremely floriferous and with little care can be kept in bloom until frost. **Azure Fairy**, lavender; **Rosamond**, soft rose pink; **White Mound**, pure white; **Formula Mixture**, above 3 colors.

TETRAPLOID HYBRID SNAPDRAGON

Pan-American Pink. A tetraploid hybrid; soft rose pink. Huge florets 2½ in. across well spaced on tremendous spikes. For late forcing or cloth house culture. Fine for outdoor cut flower production also. This is definitely the outstanding tetra snap to date—the giant of all Snapdragons.
½ Tr. Pkt.....\$1.75 Tr. Pkt.....\$3.00

STANDARD OUTDOOR OR SUMMER SNAPS

Tetra Yellow. Huge spikes and large florets, bright yellow.
Tetra U.S.D.A. #6. Deep salmon pink with white tube, similar to the diploid variety Maximum Apple Blossom. Tall graceful spikes on robust plants.
Tetra U.S.D.A. #10. Brilliant rose florets of pure color, closely spaced on strong, heavy stems.
Tetra U.S.D.A. #11. Typically huge florets of the Tetra type, solid, rich clear rose. Close-set, heavy flower spikes with heavy stems and foliage.
Prices above 4, each: Tr. Pkt.....50c 1/16 oz.....\$1.00 ⅛ oz.....\$1.75

TETRAPLOID MIXED. The most satisfactory outdoor Snapdragon offered today, a vigorous grower, almost never "crippled" with rust. Florets are huge, mostly ruffled, and stay on the stem so that 12" flower spikes are usual. Many beautiful colors and combinations, some never before seen in Snaps.
Tr. Pkt.....50c ⅛ oz.....\$1.00 ¼ oz.....\$1.75 1 oz.....\$6.00

DOUBLE SNAPDRAGONS

First giant, all double snapdragons ever grown from seed. Flowers are spectacular, not only for size but for their unusual and amazing formation. They are quite large, 1¾ in. across and 1½ in. deep when well grown. The upper lip broadens and recurves gracefully. From the rounded portion of the lower lip there is a protruding flare which is slightly frilled. Between the lips, extending out from the throat, are several small, wavy accessory petals which add grace, charm and refinement, as well as surprise, to an already handsome flower of unsurpassed quality. Unsurpassed for cutting and garden use.

Burpee Double. Flowers are rich, deep golden yellow throughout, except for the back of the buds which are flushed with rose-pink. When fully open, the pink coloring disappears entirely.
Floradale Double. Formation of the flowers is similar to Burpee Double, perhaps more double and several shades lighter in color—a soft Dresden yellow.
Lemonade Double. The immense flowers are of a clear primrose-yellow and nicely placed on long, strong stems. The central spike grows 3 ft. tall.
Prices above 3, each: Tr. Pkt.....50c 500 seeds.....\$1.00 1000 seeds.....\$1.75

GIANT SKYSCRAPER SNAPDRAGONS

Mixed Colors. These Giant Skyscraper Snapdragons were created on Floradale Farms after eight years of breeding, selection and reselection to produce a race of antirrhinums that would far surpass all others in height, and would also have more flowers per stem, the stems more upright, more rigid and the blooms of the most pleasing shades in the lighter tones. Giant Skyscrapers are the tallest growing of all snapdragons. Whether in the garden or in cut-flower arrangements they are equally striking for their distinctive beauty.
Tr. Pkt.....35c ⅛ oz.....85c ¼ oz.....\$1.50 1 oz.....\$5.50

NEW PAN-AMERICAN and SAKATA'S F-1 HYBRID PETUNIAS

The following 5 F-1 HYBRIDS are produced by crossing separate pure lines. The cost of production of hand-pollinated seed of single Petunias is almost as high as it is for the doubles, but we are certain that they are worth the difference. All are of dwarf and very uniform growth with large, well fringed flowers, 3-inches across; they flower more abundant and plants are more vigorous than the Dwarf Erfurts, either in pots for Mother's Day or as a bedding Petunia. These 5 F-1 hybrids make ordinary Petunias uninteresting.

Bolero. Our last years hybrid No. 2. Gorgeous carmine rose flowers.

La Paloma. Our last years Dwarf Fringed Hybrid Snowwhite. 100% true to type and habit.

Tango. Our last years hybrid No. 1. Deep scarlet salmon, far showier than 'Carmencita'.

TITHONIA "TORCH"

Torch is the top winner in A.A.S. for 1951. It grows as easily as a Zinnia—thrives on hot weather. It's orange red, and red is a favorite color. It's a cutflower that blooms from August until frost, grows waist high—compact enough for any garden. Torch is the result of scientific plant breeding—bred to be early enough for the North; dwarf enough for the South—an easy and disease-free annual.

HOLLYHOCK-DOUBLE TRIUMPH SUPREME

Color range of unsurpassed variety. All the favorite colors plus vivid scarlets, orange, and buff combinations not to be found in existing strains. Full double blooms gracefully waved and fringed show well above the foliage. Rust resistance is present to a high degree, greatly overcoming this major handicap to the growing of Hollyhocks in many areas. Early blooming.
